# Interview with Şişli Mayor

## 1) Could you tell us a little about yourself?

My name is Hayri İnönü. I am the mayor of Şişli. I was working at a private company before. I was appointed as a candidate for elections in 2014. I worked for Arçelik. Then I started my job here as the mayor of Şişli. My children are all living in abroad. My wife is working in a university, she is an assistant professor. I enjoy my job here. You know, Şişli is a center of İstanbul. That means it is the center of Turkey. And I am proud of being the mayor of Şişli.

## 2) Will you please mention about your education life?

I attended Maçka İlkokulu. After that I went to a German high school. And then I finished the high school. I went to Germany for business administration. This is my education life.

## 3) Do you have an interesting memory when you were a student that you remember just now?

One day, I went to the class in German high school. We have a small count of Turkish students. We took our classes together so we had a very close friendship. Most of the time we would do something that the teacher didn't like. Everybody does it. When we were at the class we were always joking with our teacher. One day we were in art class, there were books at the ceiling and one of our friend's handbag. His handbag was hung on the ceiling. When the teacher came in he asked where all the documents are. Our friend showed him the ceiling. He was very angry of course. The teacher told about that to the director of the school - he was also German - and as soon as the director came into the class they began to laugh. We did jokes like that. We never did jokes which harm the school's inventory.

## 4) Out of the job, are there any activities you like doing?

I like being at home. I go to the gym three times a week. I swim. I take care of my body. Most of the time I like being at home. I read, watch TV. I like movies. I like being with my family, with my children and their families. And I like travel. Everybody loves it of course...

## 5) Which projects do you have about schools in Şişli district?

As you know we built a couple of ten schools but we want that you have lessons, you study in a comfortable environment. They are for the private schools. We do it but it is not our job. It is not the job

of the municipality to care for schools. It is the responsibility of the Ministry of Education, but we do it just because of you. We want to make you have a comfortable education life and we want the comfort of the teachers and the comfort of the families. Therefore we are very close to our schools. When they need something, they call us. Sometimes we can't do it on time because there are fifty and more schools in Şişli. We share our resources equally to all schools. Sometimes we can't finish all these which we want but we really go on with our policy of we can care for the schools and we won't stop.

## 6) Which projects do you have about Şişli district?

We have projects and we have dreams. Everybody has a dream. There has to be a target to achieve. Same for me I want to make Şişli a very comfortable area and citizens of Şişli have a comfortable life. As you know Şişli is a very crowded place and it has a very big traffic problem. Green area is very small. We don't have any green area in Şişli. So I can't create any green area. It is my biggest problem. But we are good at social activities. We have study centers for schools. Şişli is a multicultural place. There are ethnic groups and religious schools. We are treating everybody equally.

## 7) What do you suggest or advice to students for the future?

Do what you want to do in the future! Of course it is not easy. You are going to enter the university exams and you don't know what is going to happen. You should love your job and you have to have a good education. You have to have a plan and you have to fight. Always ask and don't satisfy. Ask why. There is always an answer for the why questions. There must be a question. It is always have to be an answer for your question. The most difficult job is to earn money because you always want more. I suggest you that you should chase your dreams because if you don't have a dream, you can't get anything. You should work hard. Women also have to work harder. They should be independent. They should be their own boss. Every partner has to work. Women are equal men.

## UNFORGETTABLE DAY: A Visit to Animal Barn

We went to the animal barn on 10th of May, 2017. Before our visit to the animal barn we have read about dogs. Both my friends and our teachers were looking forward for our visit and we were very excited about our visit. We have brought dog food and newspapers. We have learnt that dog feeders give pasta to dogs instead of dog food because pasta is much cheaper than dog food. So that they can feed all the dogs in the barn. We have also learnt that they use newspaper to keep dogs' place where they are kept.

When we reached there, we saw that some of the dogs were ill, unfortunately one of the dogs was blind. We were very upset when we learned this fact. It was not allowed to approach some of the dogs not to get illness from them. But we liked all the others. At the beginning some of my friends were scared but then everybody got used to them. We even fed some of the dogs with our hands. I also met with a couple who were thinking to own a dog from the barn. We think that not only dogs but also any of the animals should not be sold. People who want to have an animal can own from barns.

We were very upset when it was time to leave from barn. Nobody wanted to leave. All of us wanted to stay a little bit more, care for them and like them. Then we returned to our school. It was a very nice day for all of us and we were happy to visit them.

I also want to add one thing. Summer is coming and the weather will be very hot. People may put some water in cups in front of their house, so dogs, cats, birds and other street animals can get water and not be thirsty.

Below you may see some photographs from our barn visit.

Zeitlich gesehen sagt es mir, dass es ungefähr 3.15 Uhr ist.

Theologisch sagt es mir, es ist offensichtlich, dass der Herr allmächtig ist und wir alle klein und unbedeutend sind.
